Musaned For Information Technology

# About us:

Musaned Information Technology is a Saudi Company that was established in 2012, at Musaned we are specialized in Enterprise software and solutions (ERP, CRM, Project Management) and other specialized solutions such as Gas Station Automation Systems, Tracking Systems, RFID solutions and more

We are also a silver partner with Bitdefender the leading antivirus for home users and businesses worldwide

Finally, we provide Technical Support and IT hardware supplies for large, mid and small businesses all over the kingdom.

# Business units:

1- Software Solutions

2- Business services

3- Applications

4- IT Hardware

# Software Solutions:

Our services cover a wide range of software solutions that can be applied to various business sectors, where the company seeks to provide flexible solutions that can be allocated, designed and adapted to suit our customers' different needs and requirements. To ensure the integration of these services, the company provides many special solutions many companies do not have .

# Business services:

Musaned has the experience and expertise to help your business meet your goals and objectives faster, with less risk. Musaned is a consulting organization that assists customers in achieving their business objectives with the use of technology. Whether you are looking at Wireless Networking, Data Backup, other IT services, or just want to better understand your current environment, Musaned can provide the expertise to help you build a strategy that is right for you.

# Applications:

Applications perform a multitude of functions. Businesses invest in apps to increase revenue and optimize processes, and consumers lean on apps for comfort and convenience. Our deep enterprise application development abilities will help — no matter your audience or goals.

# IT Hardware:

Our team of experts can provide buying guidance to help you evaluate your options, including hyperconverged or software-defined infrastructure. We'll work with you to equip you with the high-performance server, storage and networking solutions your business needs .
